The following is an examiner's statement of reasons for allowance: The present invention generally discloses a system for updating parameters of financial transactions associated with financial services initiated and completed on behalf of or directly by a user through access to a data-packet-network into more than one electronic interface accessible to the user is provided. However, the prior arts of record fail to teach, singly or in combination, at least one cobranded electronic interactive interface accessible by the user, supported by back-end software, the cobranded interface mirroring the accounts registered in the main electronic interface; and a plurality of institution-specific electronic interactive interfaces accessible by the user for providing direct account registration, reporting, and maintenance specific to accounts provided by the associated institutions, characterized in that through direct linking between the main, cobranded, and institution-specific interfaces, any parameters associated with any action initiated to a specific account through any of the interfaces is immediately propagated to the other interfaces..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
